Approximately 5-15% of peripheral T lymphocytes are Natural Killer Cells (NK Cells). These Natural Killer Cells actually protect us from infection and abnormal cells like cancer and tumor. Having a normal amount of healthy NK Cells is an important part of healthy immune system.

Salwa suffered from corneal infection. Her eyes were ulcerated, and she could not see clearly. The doctor arranged a surgery which cost about RM60,000++... Then Arni (Salwa's mother) gave Salwa AFC SOP Subarashi, Utsukushhii and Hikari. Salwa consulted the ophthalmologist again 4 days after taking it and then announced that the surgery was cancelled because the cornea was no longer infected!!! After taking 2 sets of the product, I consulted 3 different doctors again...The result was eye health, Even the astigmatism of the eyes has been reduced from 2.5 to 1.0...
